💼 Portfolio Link

Dynamic software engineer and low-key pool shark with a master's degree in Speech-Language Pathology. My cross-functional communication and creative problem-solving skills drive my passion for designing beautiful, responsive software and building strong working relationships.

SKILLS

- **JavaScript**
- **React (hooks)**
- **Redux**
- **CSS/SASS**
- **HTML**
- **Responsive**
- **Accessibility**

- **API**
- **Node.js**
- **PostgreSQL**
- **MongoDB**
- **Mongoose**
- **Knex**
- **Auth**

- **TDD :** Jest Chai | Mocha Cypress React Testing
- **CI/CD**
- **Webpack**
- **Parcel**

EDUCATION

Turing School of Software & Design
Diploma, FE Software Engineer | 2020 – 2021

University of Tulsa
MS, Speech-Language Pathology | 2015 – 2017

University of Colorado, Boulder
BA, Linguistics | 2007 – 2011

EXPERIENCE

Software Engineering Intern
Rocket Software | Jun 2021 – Present
- Built out UI components for user dashboard with React utilizing Prime React and Carbon libraries

Contract, Full-Stack Developer
Tonemash, LLC | Mar 2021 – Present
- Built and deployed CRUD API user database and integrated with UI/UX for music composition app.

Licensed Speech-Language Pathologist
Denver Public Schools | Aug 2019-Aug 2020
Cherry Creek Public Schools | Aug 2017-Aug 2019
- Evaluated and treated students (PK-8th) with speech/language disorders.

PROJECTS

KiddDo: *Repo | Deployed*
- **DESCRIPTION:** Progressive Web Application utilizing dual-user authentication and two unique interfaces.
- A gamified learning experience for kids ages ~9-12 and their parents to promote task management skills through positive reinforcement.
- Finalist in Turing's Demo Comp March 2021.
- **TECH STACK:** React (hooks), Material-UI, Auth0, AWS, TDD (Cypress, Jest)

SilverNest, v2: *Repo | Deployed*
- **DESCRIPTION:** Full stack application implementing Node with PostgreSQL and Express middleware to spin up a server, React with hooks for global state management, and the Material-UI library.
- A simulated program site for student users to search and apply for rent-free housing with an older adult participant who, in exchange, requires assistance with activities of daily living.
- **TECH STACK:** React (hooks), PostgreSQL, Knex, Express, Rest API, Material-UI, AWS, TDD (Jest, React Testing Lib)

Task App: *Repo | Deployed*
- **DESCRIPTION: Solo f**ull-stack progressive web app featuring full CRUD API endpoints, image upload, server-side sorting & pagination, authentication, and emailer on subscribe/unsubscribe.
- Built as a side-project to hone new skills in backend development.
- **TECH STACK:** Node.js, Express, MongoDB, bcrypt, JWT Authentication, multer, Sendgrid email service, React (hooks), CSS, Material-UI, AWS, Heroku
